*Junior Developer with a strong UX focus and 2 years of experience in front-end development and user experience. Delivered **banking projects using Vue.js 2 & 3**, collaborating with backend, design, and QA teams to implement secure and scalable features. Currently working on **in-house full-stack projects with React and Spring Boot**, while pursuing a **Java SE 11 programming certification**. Previous extensive professional experience performing customer-facing roles in multinational companies equips me with a solid commercial foundation and the ability to translate complex business needs into effective technical solutions, while bringing adaptability, initiative, and a collaborative mindset.*

WORK EXPERIENCE

Nfq Advisory, Solutions, Outsourcing

Junior Front End Developer

Remote

Oct 24 - Present

- Built and maintained advanced UI modules in Vue.js 2 & 3, improving responsiveness and performance in high-traffic banking applications.
- Partnered with backend, QA, and design teams to deliver secure banking features from specification to production.
- Reduced API-related errors by enhancing error-handling flows and optimizing router middleware.
- Strengthened security by refactoring authentication logic and token management.
- Increased development efficiency through reusable Vue components, technical documentation, and unit/integration testing.

Ux Junior Specialist

Dec 23 - Oct 24

- Led the implementation of a Design Tokens system, standardizing UI styles and accelerating front-end delivery.
- Designed and iterated Figma prototypes, validating complex flows against business and usability criteria.
- Produced technical documentation and flow diagrams to align cross-functional teams.
- Enhanced accessibility by adding custom keyboard shortcuts to a legacy Vue 2 app.
